

Same 8 skills, same terrain: each method's latent map vs. what its skills physically do to the soil

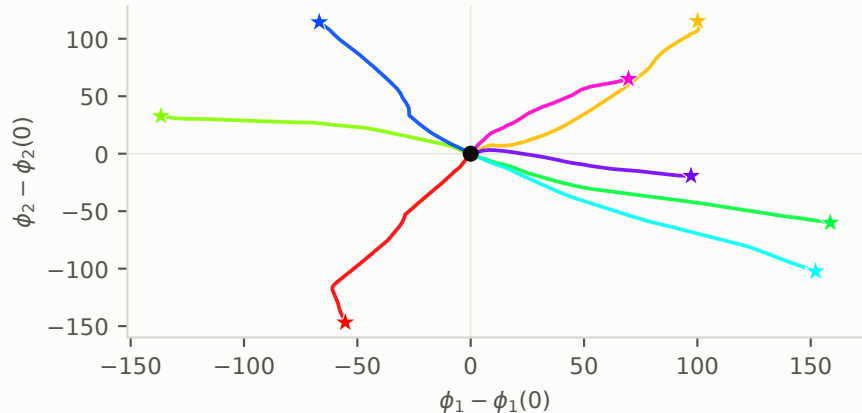

OURS: distance-max + soil-only ϕ
skill latent ϕ (start-centered)

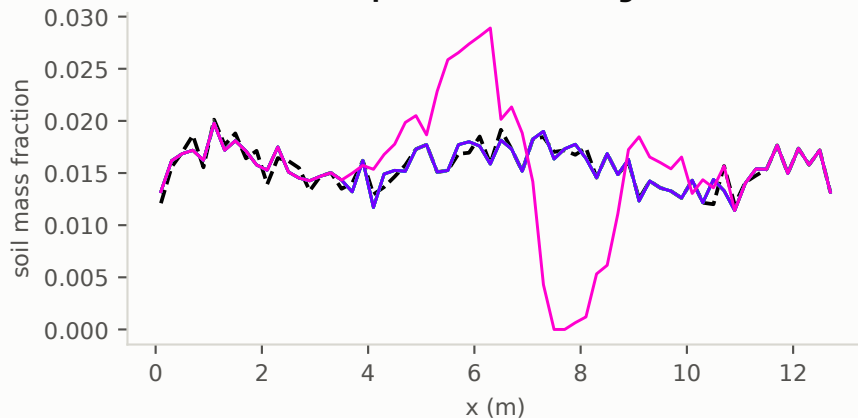

terminal soil per skill --- coverage = 0.386 m

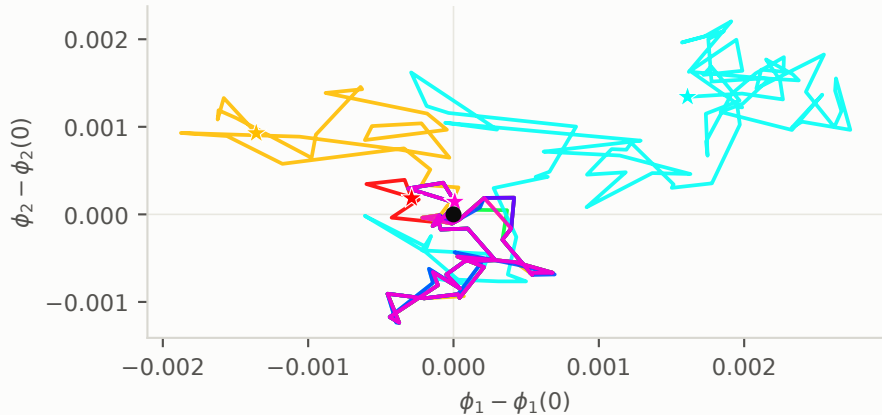

METRA (vanilla): distance-max + full-state ϕ
skill latent ϕ (start-centered)

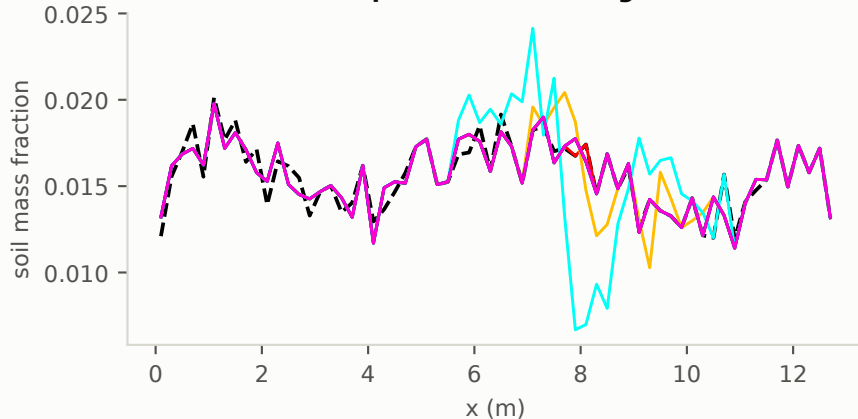

terminal soil per skill --- coverage = 0.093 m

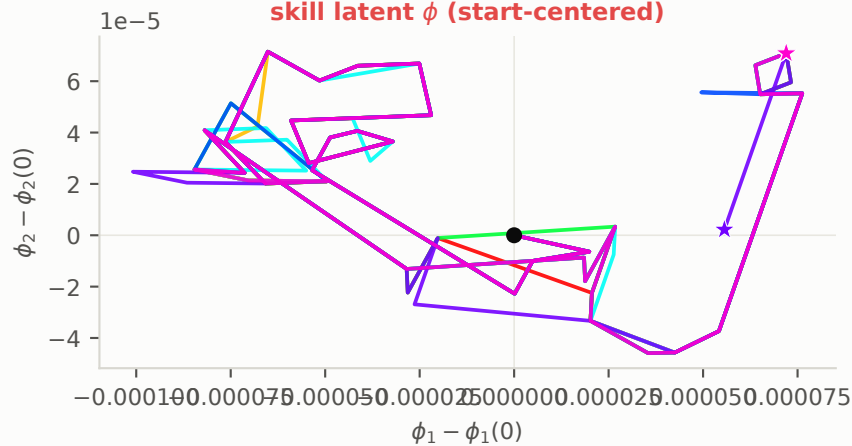

DIAYN-style: MI + soil-only ϕ
skill latent ϕ (start-centered)

terminal soil per skill --- coverage = 0.036 m

DADS-style: dynamics + soil-only ϕ
skill latent ϕ (start-centered)

terminal soil per skill --- coverage = 0.002 m
